

20 Minutes **Video** Traffic Generator

Hi Dears!

Getting more traffic from videos, the aim of this free document is to teach you simple techniques possible to drive more traffic via videos. Ok! This is the method, I just found the success!

The first thing, I don't waste more than 20 minutes for composing these kinds of videos for getting traffic and never redirect the viewers directly into my polite web sites. (This method is ethical but a little bit of????) Because the main purpose of these kinds of videos is driving viewers into the place what I need **HOWEVER**. So, I don't like to see the black blots on my business profile.

Ok! Let's getting started.....

1. select a topic for your video (The topic should be related to the destination website what you're expecting to land the viewers)
2. Download at least 20 different images related to your topic.
3. Download an appropriate music or record own voice track about your promotion.
4. Open windows movie maker, Add all 20 images and add music or voice clip, **WAIT!** Don't save the movie file.

Find a free web hosting service, create an account

5. Upload an index.htm redirect the index page (or any page) into the site you want traffic. Use Meta redirection.

```
<meta http-equiv="refresh" content="0; url=http://www.yoursite.com" />
```

6. Go to tinyurl.com and shorten your URL http://username.host.com/index.htm will be changed as http://tinyurl.com/use only numbers

Come again to movie maker

7. Add the shorten tinyurl in appropriate positions of video as it gets MORE exposure form viewers.
8. Finish Video (limit video length 60s-90s and size less than 5MB)

Distribution of video

Youtube, dailymotion, revver, metacafe, guba, yahoovideo are my favorite sites. But you can find more.

The success of this traffic driving techniques depends on the interests of the people who're watching your video. So, never redirect tinyurl straightly into your destination web site without going through a link control option like above. Because if you feel that traffics aren't converting properly, then you've to change the link.

Don't apply this techniques for getting traffic into descent web sites or sales pages because Either this video technique gives you tons of traffic neither it's a little stupid creation (little low quality) and sometimes your respectable customers may be discouraging about you.

As, I've personally tested this method works very well for HIDDEN income methods (100% honest and legal) which means, nobody knows your real profile but you're getting traffic and earn money. If you want clear idea about this process, this is one of the example video; I was created few days ago for getting traffic into my hidden profit pulling web sites works very well this technique.

Click on link if you want to download (3.6MB)

I would like to remember you again; this is a maximum 20 minutes of simple work anybody can do without spending anything. If it's so, I also waste lots of hours (perhaps week) for original quality video productions for YouTube. So, I think you've an idea

about the difference of quality and performance. **SO, THIS TECHNIQUE NOT RECOMMENDED FOR DESENT WEB BUSINESSES.**
